

# Tree Planting

We plant trees together with local volunteers around the world, to regenerate forests that have been lost due to natural disasters or logging, restore disaster-resistant forests, and address climate change. By regenerating forests full of life where diverse organisms thrive, we aim to create a "New Satoyama" where people and nature will coexist in harmony.

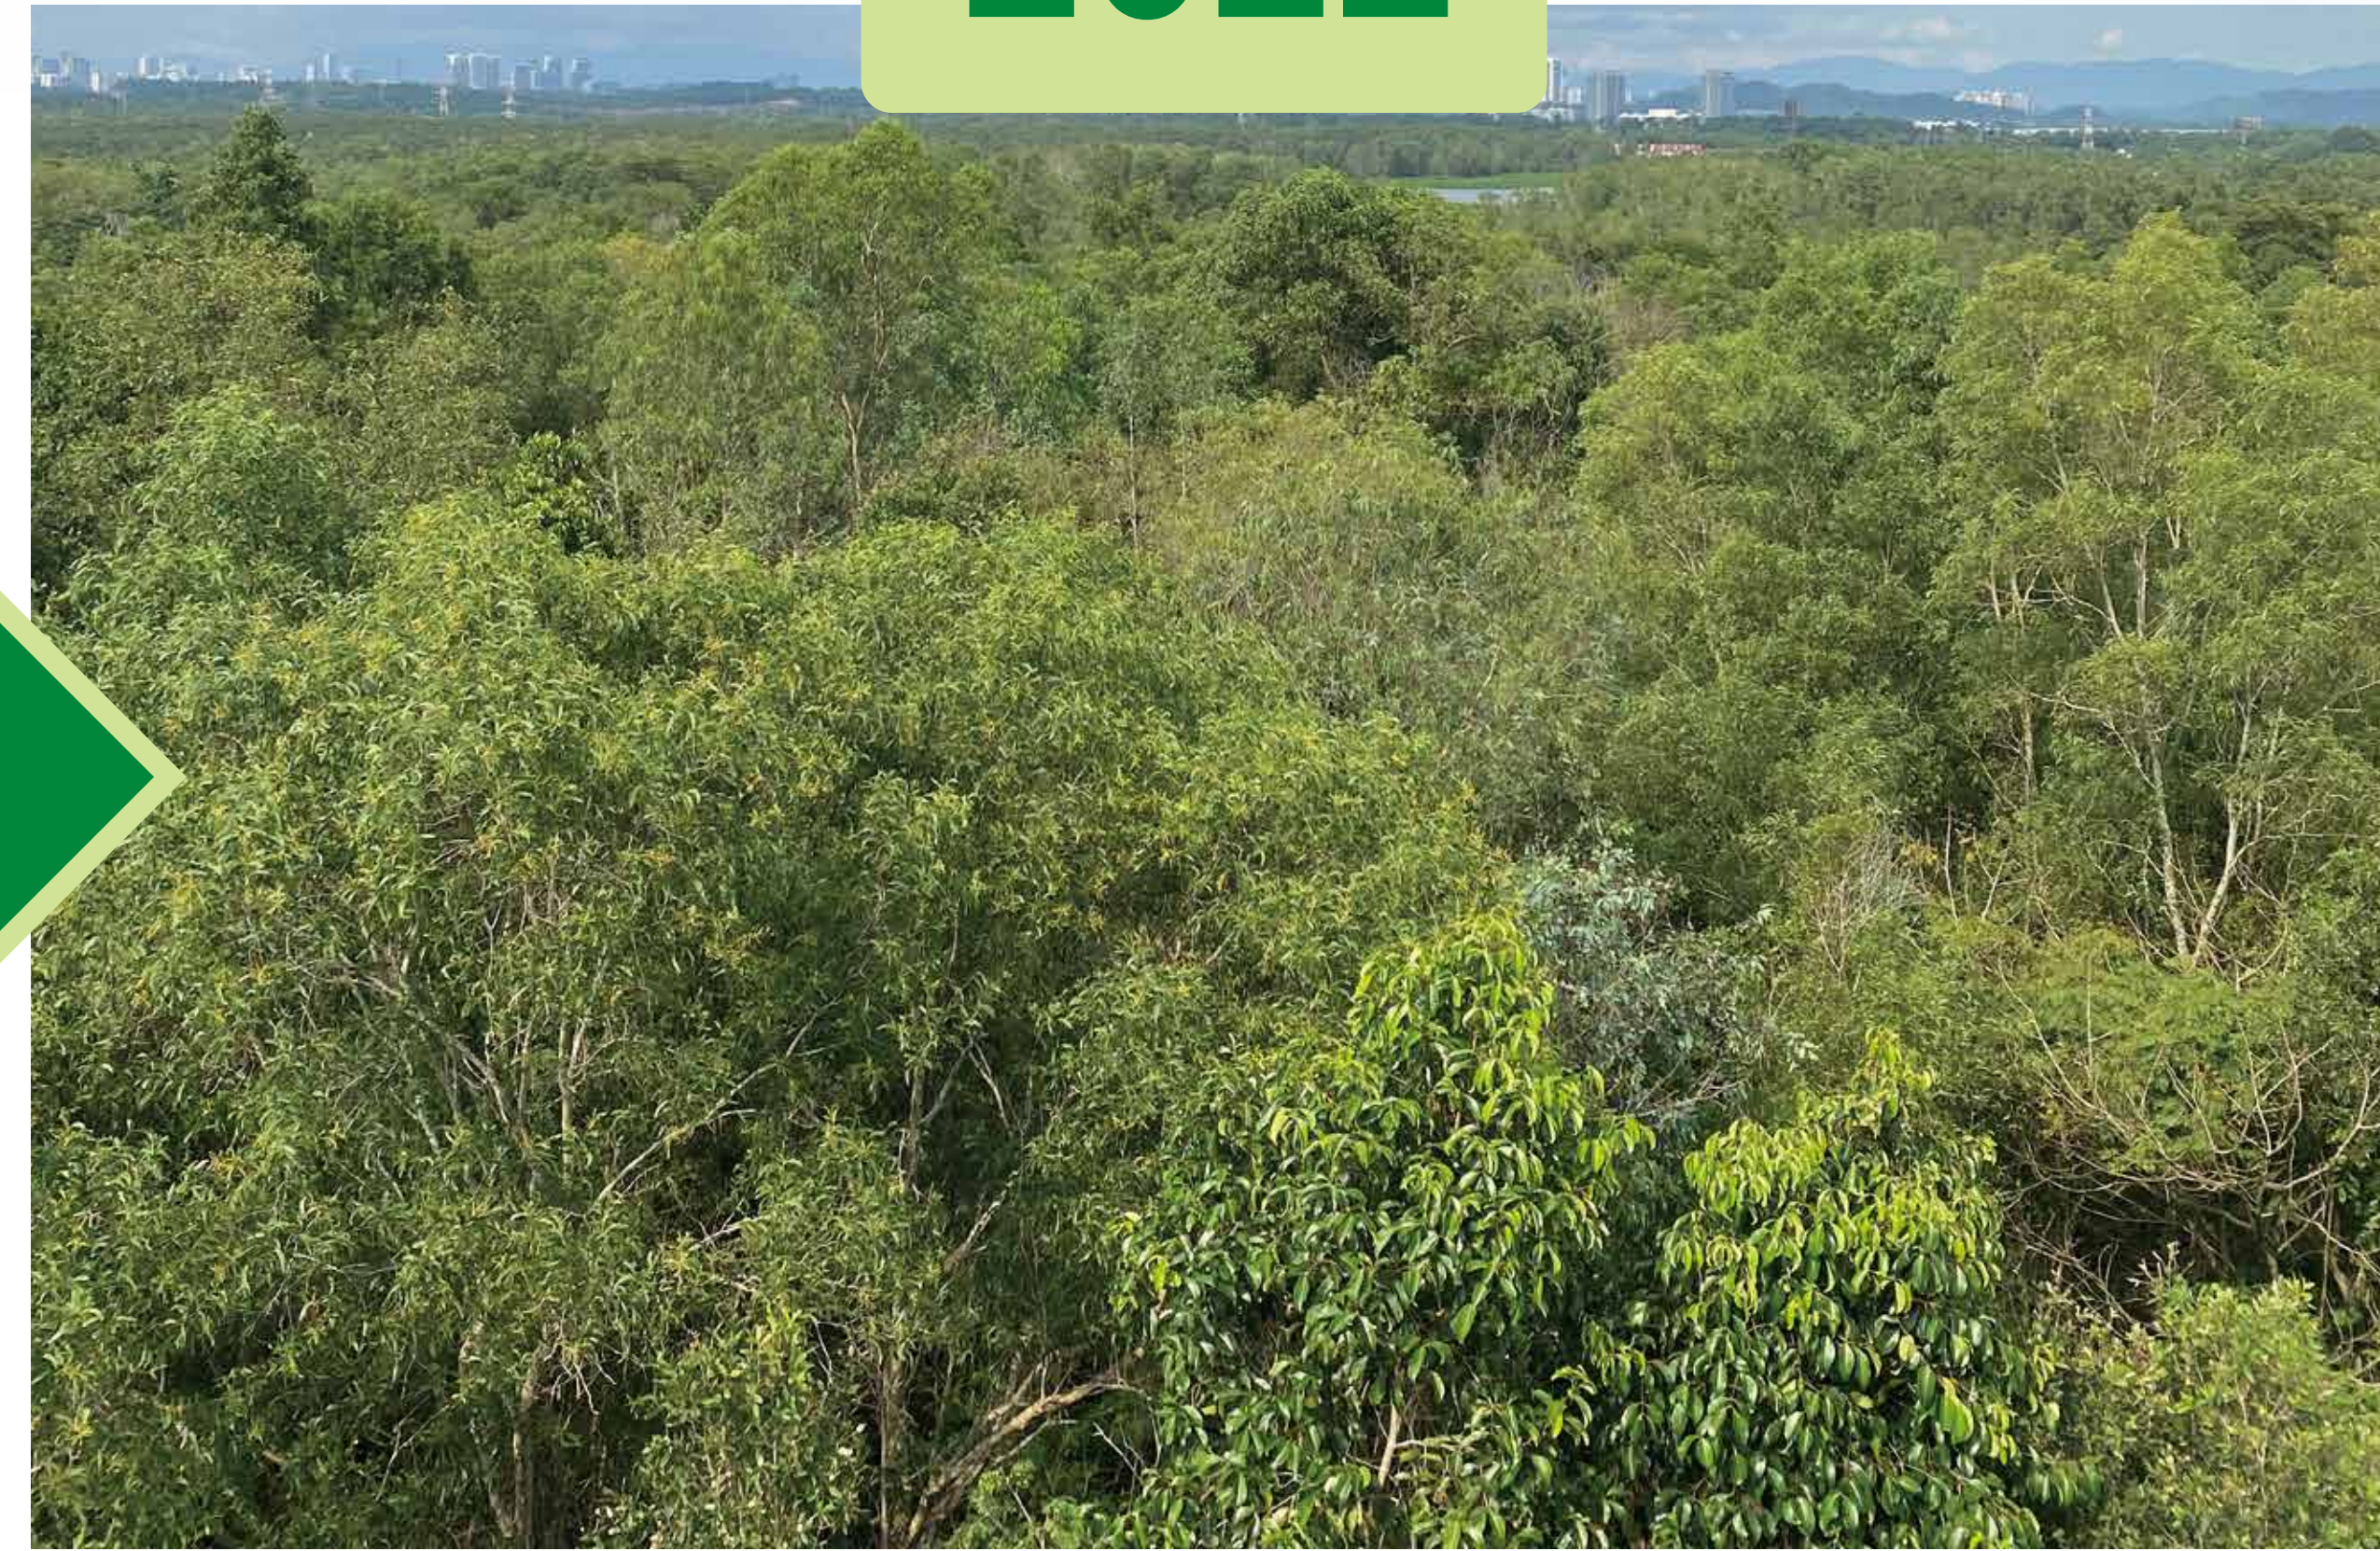

## Paya Indah Wetlands (Malaysia)

Period of Tree Planting 2004, 2008, 2009
